[Disclaimer]
--------------

The maps in this booklet have been created based on Hirakata City map data updated as of August 2014. Close attention was paid to details during editing, but due to the sheer volume of data, the information that is shown on those maps may differ from actual conditions that can change on a daily basis. In addition, some official place and facility names may have been abbreviated for the sake of legibility. We appreciate your understanding in that regard.
