

Mayor' s Message

Hello. I am Mayor FUSHIMI Takashi.

Three weeks have passed since the declaration of emergency state was issued.

I deeply concern that if many people go out during the Golden Week period, the extent of infections may cause a collapse of medical treatment systems.

In Hirakata, a city hospital doctor and a city school teacher were confirmed COVID-19 positive. Now, Hirakata remains in the balance. We don' t know when and where infections spread in this situation.

The current number of patients with the COVID-19 show people' s behaviours two weeks ago. Your current behaviours affect the outcome in two weeks. Particularly, what you are going to do during the Golden Week period largely influences our future.

Let' s protect yourself. Let' s protect your family. Let' s protect others by everyone' s right behaviours.

Please reduce 80% of contacting frequencies with others. Staying at home is the easiest way to achieve this goal. Please refrain to go out except going outside for foods, daily goods, or work.

By trying something you' ve never done due to your busy life, I hope you have a nice time at home during this Golden Week period. Thank you for watching.
