

## Hirakata City index map

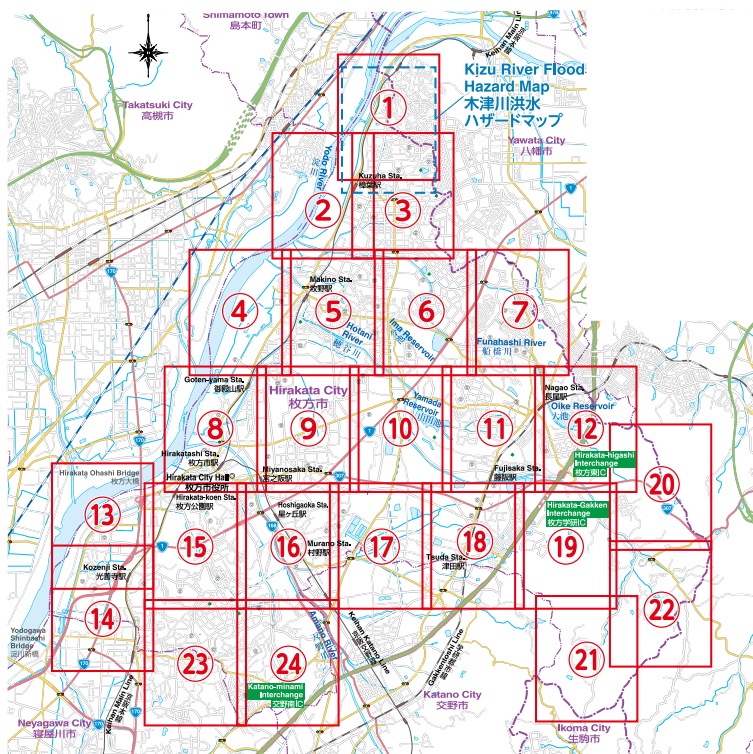

### Flood hazard maps Rainfall-triggered flooding and landslide hazard maps

Hirakata City has been divided into a series of blocks, each of which has one or more flood or rainfall-triggered flooding and landslide maps.

Find the number of the area where your home or business is located using the red blocks on the map to the right (numbered ① through ②④).

The area indicated by    on the map to the right indicates the Kizu River flood hazard map, which charts the anticipated flood zone for the Kizu River. See page 45 for details.

Consult the following table for the pages on which you can find the corresponding map(s).

| Map no. | Flood hazard maps |            |                 |              |             |            |           |            | Rainfall-triggered flooding and landslide hazard maps |
|---------|-------------------|------------|-----------------|--------------|-------------|------------|-----------|------------|---|
|         | Kizu River        | Yodo River | Funahashi River | Hotani River | Amano River | Toda River | Mae River | Kita River |   |
| ①       | P.45              | P.46       | P.47            |              |             |            |           |            | P.48  |
| ②       |                   | P.49       | P.50            | P.51         |             |            |           |            | P.52  |
| ③       |                   | P.53       | P.54            |              |             |            |           |            | P.55  |
| ④       |                   | P.56       | P.57            | P.58         | P.59        |            |           |            | P.60  |
| ⑤       |                   | P.61       | P.62            | P.63         | P.64        |            |           |            | P.65  |
